

## PERFECTLY FILTERED

With BlueNext's automatic filtering of CERs, you can be certain of the kind of projects that are available for trade on the Exchange.

We were the first and currently the only liquid Spot CER market; with over 24.5 million tons traded on the exchange since launch.

We have just partnered with the China Beijing Environmental Exchange (CBEEEX) to bring buyers and sellers of Chinese CDM projects closer together through a unique information system.

For more reasons to trade CERs on the BlueNext Exchange please call the BlueNext sales team on +33 1 7303 7370.
